- Express.js
- Spotify API
- Axios

• Matcha

• 42 SV Project

MERN Full Stack Dating Application

- MongoDB
- Express.js
- React.js
- Node.js

• Roger-Skyline-1

• 42 SV Project

Creating and configuring a remote Linux system to allow ssh and web access. I configured a Ubuntu to be protected against port scanning, to be only available through the ssh not directed at root, and with manually created partitions.
